

1. Prove that a set map  $f : X \rightarrow Y$  is injective if and only if it has a left inverse.
2. Prove that a set map  $f : X \rightarrow Y$  is surjective if and only if it has a right inverse.
3. Prove that if  $f : X \rightarrow Y$  is a homeomorphism, then  $f_*$  is an isomorphism.
4. Prove that if  $r : X \rightarrow A$  is a retract, then  $r_*$  is surjective.
